

College of Fisheries Panangad
Alumni Association

COFPAA **DIRECTORY** 2022

Jyothish Kumar S.

Preface

It gives me immense pleasure to pen down a few words as a prelude to the alumni e-directory of College of Fisheries, Panangad. The ethos and aspirations of the 36 batches of students who came out of the Fisheries College as alumni from 1979 to 2016 is simply reflecting in this endeavour.

The four-year bachelor's degree programme in fisheries leading to B.F.Sc. degree was started in 1979 to produce the highly required, professionally and technically qualified manpower in fisheries to cater to the needs of the fast-developing fisheries sector of the state and other parts of the Country. But it is very pathetic to see that the very purpose of starting BFSc course to create professionals in fisheries sector like that of MBBS, BVSc, BSc (Ag) and other similar professional courses, was somehow sabotaged and a professionalism in fisheries sector perched as a confused concept to a greater extent.

Though our alumni base is strong and vibrant, scattered across the world, it was challenging to bring them together due to the lack of a common platform. Hence COFPAA Executive Committee has decided to bring out an e-directory and make the presence of COFPAA in social media. The purpose of this directory is to create a

platform for all "Panangadians" to interact with each other, sharing skills and creativity and innovative ideas for a truly professional fisheries scenario of our living world and for the wellbeing of all members and members yet to enrol in future. The directory gives a narration to the way of life of all "Panangadians", their activities and achievements over these years. Their contributions to the world of fisheries cannot be depicted in little words.

I am sure that this creative endeavour will trigger a thought of solidarity and make our signature contributions to the collective thinking of the scientific approach to fisheries development.

I would like to thank all my Executive Committee members, Core team of e-directory and COFPAA active Group members for their valuable contributions.

I sincerely appreciate and congratulate Dr. Deepak George Pazhayamadam of 1999 batch and Dr. J. Raymond Jani Angel of 2003 batch for their valuable contributions in the making of this directory.

I would like to extend my sincere gratitude to all alumni members for their unrelenting efforts in compiling this e-directory.

Thanks and Regards,

Jyothish Kumar S.
President, COFPAA

Dr. K. Riji John

Message from the Vice Chancellor

It is very heartening to note that Cofpaa is bringing out an alumni directory. It has been 37 years since the first batch of BFSc graduates were passed out of the College of Fisheries, Panangad. Almost all the graduates have found a niche of their own in the State, the Country or across the Globe. It is highly satisfying to note that the unemployment rate is very minimal among the BFSc graduates of Cofpaa Alumni. However, showcasing this fact was very difficult without adequate data support. The present endeavour would be a very positive step in this regard. Many a times we are faced with intriguing and insinuating questions about the job opportunities of the fisheries graduates whenever the requirements of the facilities are raised in the administrative echelons. Most of the decision makers close their eyes to the fact that there are many parallel courses sprouted around us which offer bits and pieces of the subject and churn out a set of graduates that came to existence only because of the opportunities that exist in the sector. We are of the concerted opinion that the professional fisheries graduates have to be produced only

in a SAU or SFU with a robust syllabus and its dexterous delivery. The state and the country require large number of professional fisheries graduates for an impending blue revolution after the green and white.

In a state like Kerala, we need more professional graduates as the state per capita consumption is very high compared to other states and national average. We are still a fish deficit state and that has been promoting import of fish from other states leading to several malpractices of adulteration using very harmful chemicals. We need to improve the availability of fish seeds, feed, diversified species for culture and a robust health management system. The University is trying to do its best within the existing constraints for the benefit of the sector. Increase in the number of seats from 50 to 80 and proposed new colleges would go a long way in realizing our dreams of an impending blue revolution.

I congratulate all those behind this endeavour and wish the very best for all our alumni graduates.

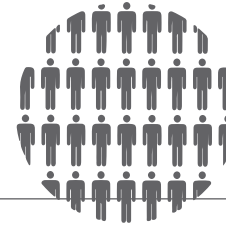

Thanks and Regards,

Dr. K. Riji John
Vice Chancellor, KUFOS

Acknowledgements

“We thank everyone who had actively participated in gathering data for the e-directory of COFPAA. This is the third directory published by the association but the first one in the last 25 years. We had lost contact with many during this period and therefore it was a herculean task to chase people and get their contact numbers/ email. For the same reason, the e-directory is not 100% accurate and does have missing information. Having acknowledged that, all efforts have been taken to ensure that the information in the directory is complete and reliable.

We would like to thank COFPAA officials, especially the President Shri. Jyothish Kumar for taking this initiative and the Secretary Ms. Nisha Raj for developing the contact network that facilitated the whole mission. The COFPAA executive members have been immensely helpful in reviewing the e-directory and gathering contact details of alumni who were otherwise unreachable. There are many individuals or coordinators who acted as a proxy to reach their respective batch members and their contribution has been very critical in getting the directory 80% complete and we would like to thank each one of them for their enthusiasm and help when approached.”
