- 2-inch inlet pipe
- 3-inch outlet pipe
- Minimum FRP wall thickness: 4 mm
- Provided with supporting legs
- Blue colour finish.

1. **2. Technical Specifications for FRP tank – 1,500 litres with internal filtration chambers (bio filtration chambers) – 2 Numbers**

- Dimensions: 278 cm × 90 cm × 60 cm
- Four internal chambers
- Holding sheets to be provided in the first and third chambers
- 2-inch inlet pipe
- 3-inch outlet pipe
- Minimum FRP wall thickness: 4 mm
- Provided with supporting legs
- Blue colour finish

General technical requirements

1. The tanks shall be fabricated using good-quality, durable and water-resistant FRP material suitable for aquaculture applications.
2. The internal partitions shall be properly integrated and sealed to ensure leak-proof operation.
3. All internal surfaces shall have a smooth, non-toxic finish suitable for aquatic organisms.
4. The tanks shall be structurally reinforced to withstand the load when completely filled with water.
5. The supporting legs shall be sufficiently strong to ensure stability under full operating conditions.
6. All inlet, outlet and other fittings shall be properly installed and leak-proof.
7. The tanks shall be supplied in ready-to-use condition at the fish hatchery near the Idamalayar Power hose of KSEB

Warranty Period

Two year service warranty for the filtration tanks of 1000 L and 1500 L capacities from the date of supply.

Delivery period

The water tanks shall be delivered within 7–10 working days from the date of issue of supply order.
